

# Become a Kirklees ENERGY-HERO

Learn how to save money on your energy bills, and help other people do the same at this **FREE** training and information session!

The current economic climate and seemingly relentless increases in fuel bills means people are feeling the strain as well as the cold this winter.

These **FREE** information sessions will teach you the facts about household energy use, and arm you with tips and advice to help yourself and others make positive changes to their health and wellbeing, and help them reduce the cost of their fuel bills.

The training is offered as part of Kirklees' Affordable Warmth Strategy to develop and support community energy champions and help spread the word on all available support.

**Transform yourself into  
your local neighbourhood  
Energy-Hero by learning about:**

**Energy efficiency** - simple measures and practical advice

**Solutions** - information on switching fuel providers, grants, and national and local schemes

**Heating systems** - how to identify different systems and operate them

**Ventilation** - how to prevent condensation, damp and mould prevention

**Fuel poverty** - what it is, how it is recognised, and health implications

**Renewable systems** - a brief introduction to the world of renewable energy sources
